

## **Product Backlog**

<b>Product Backlog Item (PBI)</b>	<b>Priority (1 -10, 1 is highest)</b>	<b>Reason for selecting Priority (Business Value, ROI, Time, Dependencies)</b>
Design the UI for main functions	2	Because the system needs to have implemented with consistency first
Measure the code complexity	1	Because this is the core functionality of the software
Generating reports	3	This only takes place at the end of the implementation
